s.sriumeswara@eseco.com.my

Pain Points

- Lack of infrastructure, poor collection method, regulation
- High contamination rate – leads to import of plastic scraps
- Collectors are choosy – economies of scale
- Unavailability of recycling technology due to lack of supply and inconsistency
- No transparency
- No sustainability
- Illegal branding (reuse/refill containers)
- No RRI data (Recovery & Recycling Inventory)
- Deriving baseline collection and leakages rates for post-consumer plastics products
- Poor engagement/support within the supply chain

Current Scenario of Plastic Wastes in Malaysia

- 1) Plastic Waste Composition – 13.2% of the total MSW
- 2) Waste is calculated based on percentage & average weight
- 3) Brand Owners are NOT involved
- 4) NO RRI (Recovery & Recycling Index) analysis – NO Data, NO report
- 5) NO/LOW Sustainability & Circular Economy efforts
- 6) NO value/low value for non-recyclable/light weight/non-commercial post-consumer plastic waste

Layers of Waste Generators/ Recycling Process of Post-Consumer Plastic Waste in Malaysia

- 1) Brand Owners
- 2) Manufacturers (Raw Material Suppliers)
- 3) Suppliers & Distributors
- 4) Retailers (Hypermarkets, Malls, etc.)
- 5) Consumers
- 6) Waste Collectors (Separate – Sell) [leakages; weight - brands/qty not declared; selective of materials]
- 7) 1st Recycler (Collect/Buy from waste collectors - macro sorting – Compact – Sell) [no brand/qty; illegal/not registered]
- 8) 2nd Recycler (Buy – Micro sorting – Crush – Sell)[similar to 1st recycler]
- 9) 3rd Recycler (Buy – Wash – Palletize –Sell) [mostly legal operators]
- 10) Buyers from several Industries

BENEFITS

Collection through circular economy solution offers:

1. Can deploy at all location
2. Customer/collector can be rewarded when they recycle
3. Creates job opportunity – social entrepreneurship – turning informal collectors to formal and trained collector
4. Real time data collection help informed decision
5. EPR can be implemented because manufacturer can know whether their product is being recycle
6. IoT allow operator to plan their collection, hence reduce cost
7. Now manufactures can know if their packaging being recycled or not therefore increase CSV (creating shared value) effort
8. Creates a value to all types of post-consumer waste
9. No/low contamination
10. Consistent supply creates market demand
11. Data on collected materials help decision on production, need in technology, etc.
12. Quantify collection against production/supply

Data sharing

Know Who Is Your Highest Contributor

Data Collection, Reporting & Commitments

- Data collected can be supplied to the project owner.
- Reporting on data collected will include the details as mentioned below together with sustainability report.

The data are as follows:

- a) Name*
- b) Items
- c) Mobile number*
- d) Brand audit
- e) Quantity
- f) Outlet*

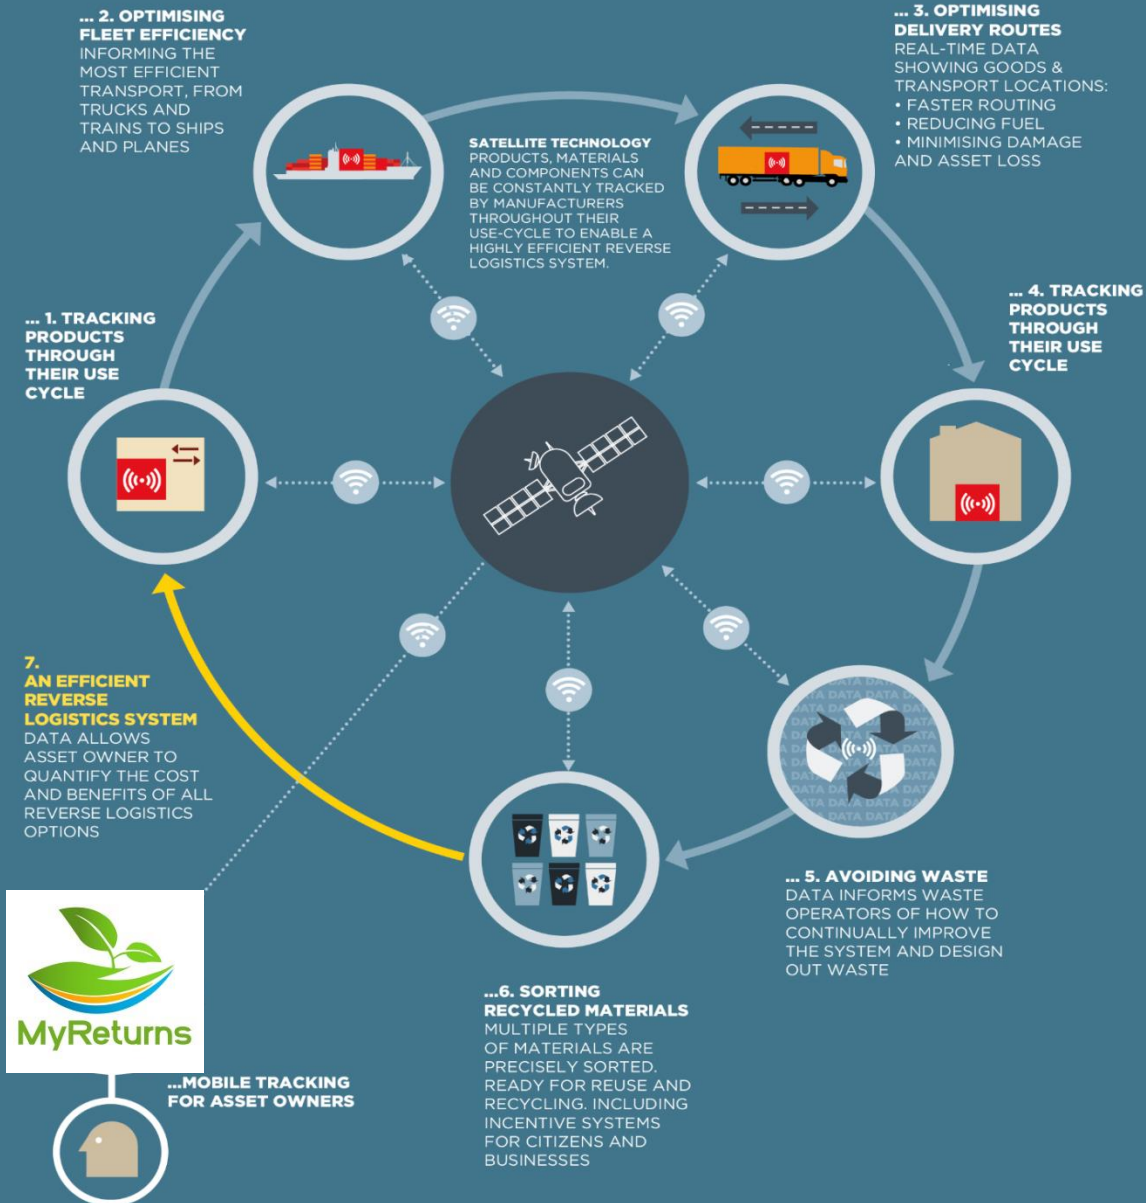

DATA is crucial for planning – Recovery & Recycling Inventory (RRI)

A global circular economy will become 'intentionally transparent'. This open mindset has released a surge in trust throughout the world's supply chains that encourages higher visibility and greater control over responsible sourcing. ES ECO solutions now have ethical and sustainable circular supply chains in which the rewards are shared equitably, right from local communities through to the primary consumer and beyond.

INTELLIGENT ASSETS HELPS GETTING THE RIGHT STUFF TO THE RIGHT PLACE BY...

Case Study Results

- Current engagement with MBPJ at SS22 & SS22A
- Total penetration of residents using MyReturns – 70% of 832 residents
- Duration 6 months – since April 2019
- Recyclable items are being segregated by the residents using MyReturns app; collected and sorted based on types, brand, quantity, etc. by ES ECO
- Real time data during collection help fast decision making
- Create Shared Value between the producers and consumers
- Mutual benefit (win-win) for all

Era Suria Ecopreneurs Sdn Bhd (ES ECO) received a certificate of appreciation from the Mayor of Petaling Jaya, Dato' Mohd Sayuti Bakar for its efforts in cultivating 3Rs communities and promoting 'Circular Economy' via its IoT system and mobile application 'MyReturns' among the residents of Petaling Jaya.

What are the benefits to our Green Reward Partners?

- ✓ Advertisement & promotion
- ✓ Store locator feature (dealers)
- ✓ Growth of customer base & revenue - new opportunities
- ✓ In-app campaign(education & awareness via technology)
- ✓ Support 'GREEN' initiative & Corporate Environment Responsibility (CER)
- ✓ 'GREEN Business' endorsement by DOA; Greentech Malaysia; MIDA; DOE-MESTECC
- ✓ Green Investment Tax Allowance (GITA) and/or Green Income Tax Exemption (GITE) by Greentech Malaysia/MIDA
- ✓ Creating Shared Value (CSV)
- ✓ Zero Waste to landfill
- ✓ Zero Environmental Pollution
- ✓ Cost saving
- ✓ Eco-friendly – low carbon
- ✓ Promote Recycling
- ✓ Communications materials (infographic; video; notifications)
- ✓ Customer perceptions
- ✓ Brand loyalty
- ✓ One-to-one engagement
- ✓ 4Ps Marketing (Product, Price, Place, Promotion)

List of Qualifying Activities for GITA & GITE (Greentech Malaysia)

No.	Qualifying Activity	Remarks
1.	Renewable Energy	Commercial & industrial business entities which undertake generation of energy by using renewable energy resource such as: Biomass, Biogas, Mini hydro, Geothermal & Solar power.
2.	Energy Efficiency	Companies investing in energy efficiency equipment or technologies and/or to replace old inefficient equipment and invest in energy saving equipment.
3.	Green Building	Building owners of the commercial/industrial building that have been awarded green building certificates from locally developed rating tool/certification body approved by the Government.
4.	Green Data Centre	Companies that purchased any energy efficient product or solution for data centre.
5.	Waste Management	Companies which undertake/invest in waste recycling or waste recovery or waste treatment and additional activities such as composting or store or collection or disposal or circular economy.

Benefits for all

Producer

- Zero waste and reduce CO2 & GHG emission from products waste (reduce carbon footprint)
- Support Circular Economy – Waste as Resource
- Data support RRI (Recovery & Recycling Index)
- Enables R&D (Research & Development)
- Encourage producers to take accountability of their products throughout the supply chain
- Create brand loyalty
- Sustainable and traceable products
- Cost reduction

Consumer/ Citizen

- Eradicate and reduce waste at landfill
- Encourage the habit of recycling and change in mindset
- Increase national recycling rate
- Obtain financial incentive for recycling
- Reduce Carbon Footprint
- Education & Awareness

Nation

- Zero Waste – Reduce waste at the landfill
- Reduce energy – transporting waste
- Reduce CO2 & GHG emission at the landfill
- Enhance Recycling Industry
- Reduce importation of waste
- Provide data support (RRI)
- Provide enhancement to waste management stream
- Change in public mindset towards material recycling
- Increase national recycling rate

Recycler

- Source of clean post-consumer waste
- Reduce energy – transporting waste
- Enhance Recycling Industry
- Reduce importation of waste
- Provide data support (RRI)
- Provide enhancement to waste management stream
- Increase national recycling rate
- Opportunity for Up-cycling

KEY Success factors

Commitment Towards a Sustainable Green Initiatives

MyRVM

AN INNOVATIVE RECYCLING SOLUTIONS

Prepared by:
Era Suria Ecopreneurs Sdn Bhd
February 2019
Version 2.0

Reverse Vending Machine (RVM)

CURRENT VERSION

NEW VERSION

RVM prototype submitted to SW Corp on 4th January 2019.

- PET bottles
- Aluminium cans
- Beverage cartons

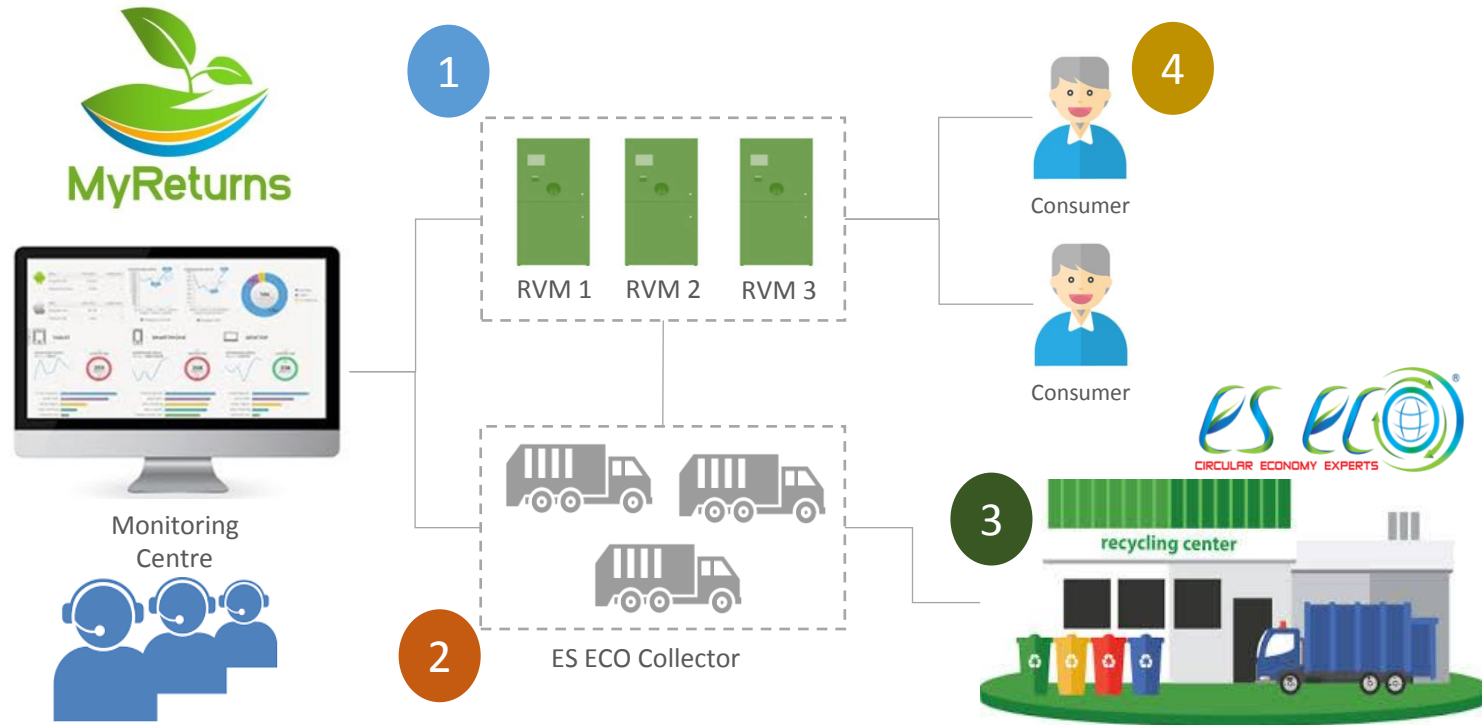

Integrated with MyReturns mobile app and a back-end support system.

Available at:

- SW Corp Cyberjaya
- PJ Eco Recycling Plaza
- 1U Shopping Mall

OPERATIONS OVERVIEW

Complete Eco-System For Recycle Waste Initiatives

Checking method:

1. Call from user
2. Automated: ping the machine every 30min

1

The sensors will identify when the RVM is almost full and ready for collection

2

ES ECO to collect all the waste & send to recycling centre.

3

Waste will be weigh, sorted by grade, brand & type for circular economy.

4

MyReturns will reward the consumer.
